Innovation & Technology: Building Information Modeling (BIM)

An emerging technology is shaping the future of commercial real estate. BIM is the newest technology used by architects, engineers, contractors and property managers to design, document, construct and manage properties using a computer generated 3-D model and integrated database.

Schedules are being shortened, change orders are being reduced, and contracts are being revised with the adoption of BIM. Learn how this trend is changing the industry.

OUR DISTINGUISHED PANEL:

Scott Arfsten, Regional BIM Manager, Turner Construction Company
Digby Christian, Senior Project Manager, Sutter Health Support Services
Teresa Goodwin, Vice President, BJC Architecture + Engineering
Hans Lapping, Transactional Shareholder, Miller Starr Regalia

MODERATED BY:

Mike Consol, Associate Publisher, San Francisco Business Times
